Taking initiative

ABOUT

I am a communicative System Administrator, previously a Full-Stack Developer. Taking initiative and determined, I enjoy learning new technologies and do not hesitate to ask for help if I encounter a problem beyond my scope of expertise.

Interested in: Site Reliability Engineering, Cloud Computing, DevOps

WORK EXPERIENCE

SYSTEM ADMINISTRATOR

Oxylabs | January 2023 - Present

Currently work as a System Administrator in the Scraper team at Oxylabs. In our team we manage around 1000 servers in total, including on-prem, bare-metal servers, as well as VM's and a few Kubernetes clusters. Doing multitudes of different tasks including solving server issues, responding to calls, writing CI/CD pipelines, scripting, automating tasks and introducing new technologies.

LEAD FULL STACK WEB DEVELOPER

TU Delft X | May 2019 - May 2024

Responsible for creating and maintaining projects related to TU Delft X's event booking systems. Created Live Gym Tracker. Rewrote the backend of the system to adapt to a new REST API. Maintaining both frontend and backend of the main site's Event Schedule, Event Display, Pricing and Information tabs, Live Gym Tracker. Later on, developed a BI solution and consulted engineers about the design of the system.

SOFTWARE ENGINEERING INTERN

Nasdaq | June 2021 - August 2021

Joined a team and worked on a real-life product being delivered to a foreign stock exchange. Built and tested Java backend validators, created frontend React components, debugged existing Java code and CI/CD pipelines. Participated in daily scrums, sprint plannings and retrospectives.

EDUCATION

MASTER'S OF COMPUTER SCIENCE AND ENGINEERING

Instituto Superior Técnico | 2021 - 2022
5 Master's Degree courses during exchange programme

BACHELOR'S DEGREE OF COMPUTER SCIENCE AND ENGINEERING

Delft University of Technology | 2018 - 2022
GPA : 8.0

PROJECT EXPERIENCE

FITNESS TRACKER

Created a Live Gym Tracker for TU Delft X's website that allows users to see live data about current number of people in the gym, as well as previous trends, letting them choose their preferred time of visiting the gym. Before 2020, it existed on the landing page of TU Delft X. Made in Vue.js. Server logic built with Axios (Node.js), database created with PostgreSQL.
